- This Service kit can be used as a substitute for DEFROST TIMER (QSWTD0023CBED). Please follow these steps to replace the defrost timer using the parts (Harness and solderless term) enclosed.

Procedure

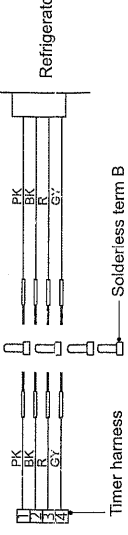

1. Cut the lead wire of the refrigerator like the following picture.

2. Strip the lead wire insulation by 15 mm.

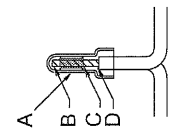

3. Connect the wire harness of the refrigerator and Timer harness by Solderless term B.

GENERAL NOTE on caulking Solderless term

- Caulk the center of steel part inside Solderless term by special tool of JST <A>
- The end of cable core shall be out of steel part inside Solderless term
- The neck of cable core shall be outside of steel part inside Solderless term <C>
- All the cable core shall be inside Solderless term <D>
- No abnormality shall occur by the tension (100N) to wire.

4. Connect the connector of Timer harness and the connector of Defrost timer.
